Removable Dentures. Dentures are removable tooth prosthetics designed to look and function like natural teeth. For thousands of years, some form of denture has been used to fill in the gaps left by missing teeth, although today's dentures are much more advanced and easier to care for. Most dentures are composed of replacement teeth attached to plastic bases that take on the appearance of the gums.

### Removable Dentures - Corpus Christi Advanced Dentistry

Removable partial dentures usually consist of replacement teeth attached to pink or gum-colored plastic bases. Depending on your needs, your dentist will design a partial denture for you. A partial denture may have a metal framework and clasps that connect to your teeth, or they can have other connectors that are more natural looking.

### American Dental Association - Removable Partial Dentures

Although current treatment options also include fixed partial dentures and implants, removable partial dentures (RPDs) can have advantages and are widely used in clinical practice. However, a significant need exists to advance materials and fabrication technologies because of the unwanted health consequences associated with current RPDs.

### Removable Partial Dentures: The Clinical Need for Innovation

A removable partial denture usually has replacement teeth attached to a metal or acrylic (plastic) base that matches the color of your gums. Partial dentures often have some form of clasp that attaches to your natural teeth and can easily be taken out of your mouth for cleaning or storing while you sleep.
