Catch Up Industrialization The Trajectory

Catch-Up Industrialization offers an innovative examination of the economies of East Asia from the 1960s into the first decade of the twenty-first century. The book examines the way the political ideology of "developmentalism" has driven economic growth, the significance of innovative production and management techniques, the patterns of industrial relations characteristic of late-developing economies, and the way education shapes the workforce.

Asia's economic transformation: Lessons for Africa

Industrialization seems to be the only way forward for increased productivity, high growth and economic transformation. In the case of East Asia, both supply and demand side factors came together simultaneously to cause the miracle. Governments in places like South Korea, Taiwan and Japan bet big on domestic manufacturing.
