Cut the left segment. Gather a small segment of hair at the front left side to use as your first guide. Pull the segment of hair straight at a 90° angle. Slide your fingers towards the ends of the hair until you reach the point you would like to cut off. Trim the excess hair. Cut the remainder of the section with the aid of the traveling guide.

The first 15 feet on either end of your rope gets by far the most use, wear, and friction. You're constantly tying into that section, and, more important, the rope absorbs the impact of most falls there, so that part gets a lot of abrasion from carabiners. These parts will get fat, frayed, fuzzy, and after time will generally look different from the rest of the cord. Even after one season ...
