Continuous vs Batch. Typical drivers for choosing continuous instead of batch reaction are fast kinetics, highly exothermic heat of reaction, or hazardous reagents. However there are several things to look for in the batch reaction to cause one to think about continuous. Many of these are quality and cost drivers in addition to safety.

m P{A} =-. n The basic difficulty in solving problems by this method consists in a suitable choice of the space of elementary events. In this connection, particular attention must be given to verifying that the chosen elementary events are equally probable and that in the computation of m and n the same space of elementary events is used.
