## Montgomery Solutions Manual

Investigators perform experiments in virtually all fields of inquiry, usually to discover something about a particular process or system. In this course, you will learn the basic concepts of experimental design, and the statistical analysis of data. The course begins by introducing different probability and sampling distributions.

Experimental Design Structures

Treatment Structure Consists of the set of treatments, treatment combinations or populations the experimenter has selected to study and/or compare.

Combining the treatment structure and design structure forms an experimental design.
