Earth, third planet from the Sun and the fifth largest planet in the solar system in terms of size and mass. Its single most outstanding feature is that its near-surface environments are the only places in the universe known to harbour life. It is designated by the symbol  $\oplus$ .

### Earth - Encyclopedia Britannica

Planet Earth is a science fiction television movie that was created by Gene Roddenberry, written by Roddenberry and Juanita Bartlett (from a story by Roddenberry). It first aired on April 23, 1974 on the ABC network, and stars John Saxon as Dylan Hunt. It was presented as a pilot for what was hoped to be a new weekly television series. The pilot focused on gender relations from an early 1970s ...

### Planet Earth (film) - Wikipedia

Earth is the third of nine planets in our solar system. Its surface is mostly water (about 70%), and it has a moderately dense nitrogen and oxygen atmosphere that supports life. Rich in iron and nickel, Earth is a dense, molten oblate sphere with a solid core and a thin outer crust.
