Volvo electrical problems are typically caused by a faulty connection or corroded ground. Quite often the issue is the connections at the Volvo Central Electronic Module (CEM). Central Electronic Module (CEM) is the main electrical module on Volvo vehicles that communicate with the rest of the modules and components in your car. When it fails it can cause unpredicted intermittent electrical ...

Intermittent Volvo Electrical Problems | YOUCANIC

Module Pro. I had a problem with my ABS/DSC/BREAK being lit on the cluster of my dash, on a E39 model. I found out that it was a very common problem in the module for this model of BMW. It has to do with the module being to close to the engine. The heat produced by the engine and time taking its toll produces the module to malfunction.
