Functions Modeling Change: A Preparation for Calculus ...

In this section, we'll create a function `ranking_ir()` that will take a query as an input and return the top 10 relevant documents. This function will follow the information retrieval(IR) pipeline. First, it will pre-process the query. Then, it will generate the vector for it. After that, it will rank the documents based on the similarity scores.

Information Retrieval using word2vec based Vector Space Model

In this version, Fujitsu has enhanced the function for creating a Bill of Process (BOP) that stores and manages data (hereafter referred to as process information) such as parts, work procedures, locations, equipment and tools, and manufacturing know-how used in product assembly in product
