DLNA Certification Guidelines. Each type of DLNA-certified device serves a specific role in a home network. Some products store media and make it accessible to media players, and others control and direct media from its source to a particular player in the network. There is a certification for each of these roles.

What DLNA is and How to Use It - Lifewire

Thanks NX5, I checked the LG website on the following link: Media Sharing and DLNA Setup on a LG TV - LG Consumer Knowledge Base This states that mkv files (using h264 codec even at 1080p and 30fps), which the majority of my files are is supported via DLNA. Regarding the homeplugs, I was only ever going to consider 200mpbs anyway.
