Technical Service Advisory for Users of the 1 NIKKOR VR 10 ...

Its optical formula largely remained untouched until the introduction of the Nikkor-P•C 105mm f/2.5 Auto in the early 1970s. The newer optical formula was perfected by Wakimoto Zenji's prodigy, the original Sonnar-type design was replaced by a Xenotar-type design that's more widely known now as the "Gauss" version. The later "Gauss" variant can be easily identified by its lens ...

Repair: Nikkor-P 105mm f/2.5 Auto | Richard Haw's Classic ...

For a zoom lens you can specify the end points of the focal range, It was interesting to note that all Nikons could display apertures such as f/1.0, f/1.1, f/1.2, or for that matter, f/95, even though no CPU-enabled Nikkor lens has been made with such values.

CPU-modification of Nikkor lenses

The contacts do not protrude enough. Glue a shim in place first to confer the appropriate stand-off, then the CPU, thus ensuring electrical contact. The contacts protrude too far, risking damage to the camera and/or CPU. Remove metal from the barrel to 'countersink' the CPU appropriately.
