Practical Paediatric Nephrology

Special emphasis is given to new knowledge that has accumulated on the molecular pathophysiology and molecular genetics of various kidney diseases in order to deepen and strengthen the practical approach to common problems in pediatric nephrology. Aimed at an audience of general and family practitioners, pediatricians and trainees who are not exposed on a day-to-day basis to pediatric nephrology problems, it provides a logical, concise and cost-effective approach from which they can profit ...

here portray the successes and offer practical advice that can only come from actual parents who are raising children who have kidney disease and from adults who developed kidney disease at a young age and continue to thrive.

For Kids and Parents | Renal Support Network

This book is written as a practical guide to procedures commonly performed by physicians, trainees, junior doctors and nurses in pediatric nephrology practice. Although there are quite a number of procedural books, hardly any have been written keeping the pediatric nephrology community in mind and focusing only on procedures.

An ability to pay attention is important for success both at school and at home. A 6-year-old should be able to focus on a task for at least 15 minutes. By age 9, a child should be able to focus attention for about an hour. It is important for the child to learn how to deal with failure or frustration without losing self-esteem.
