These areas, collectively called respiratory centers, are summarized here: The medullary inspiratory center, located in the medulla oblongata, generates rhythmic nerve impulses that stimulate contraction of the inspiratory muscles (diaphragm and external intercostal muscles). Normally, expiration occurs when these muscles

Bookmark File PDF Respiratory Study Guides

relax, but when breathing is rapid, the inspiratory center facilitates expiration by stimulating the expiratory muscles (internal intercostal muscles and abdominal muscles).

Control of Respiration - CliffsNotes Study Guides

The final respiratory issue we'll be going
