RoboDK supports all KUKA robot controllers since KRC2, including KUKA KRC3 and KRC4 controllers. This documentation is based on a KRC4 controller. The KRC4 robot controller runs the Microsoft Embedded Windows 7 operating system. Previous controllers, such as KRC2, run Windows 95. The robot teach pendant shows an "HMI" which is a program that KUKA developed to run on Windows and it is the ...

KUKA's new approach to programming: the Application Framework provides an editor that assists you in modeling the robot's work sequences graphically.. Using the smartPAD, it is also possible to check the individual work steps that you modeled previously and, if necessary, intervene manually at any time.. The fact that the JAVA program code is displayed in so-called blocks means that ...

KUKA Connect automatically organizes all robots in your company's organization into one or more Sites that correspond to the robots' geographical location. In each Site, robots are manually arranged into a hierarchy of areas, groups, and teams by the organization's administrator(s). Administrators structure each hierarchy based on their real-world factories.
