### **What is Packaging Design? (Essential Design Handbooks S ...**

Product packaging design refers to the creation of the exterior of a product. That includes choices in material and form as well as graphics, colors and fonts that are used on wrapping, a box, a can, a bottle or any kind of container. It's a practical tool, yes. (I mean, how else are you going to effectively get beer into your mouth?)

### **The Ultimate Guide to Product Packaging Design - 99designs**

Packaging is the activity of designing and producing the container or wrapper for the product. It is an important and effective sales tool for encouraging the consumers for buying. It is powerful medium for sales promotion.

### **Meaning, Function, Types, Importance & Features of Packaging**

Packaging is the science, art and technology of enclosing or protecting products for distribution, storage, sale, and use. Packaging also refers to the process of designing, evaluating, and producing packages. Packaging can be described as a coordinated system of preparing goods for transport, warehousing, logistics, sale, and end use.

### **Packaging and labeling - Wikipedia**

The product packaging is a form of passive advertising that communicates to the specific consumers about the products' essential details. It would be best if you focused on designing a unique, outstanding packaging and that targets particular consumers. The packaging should also communicate about your brand values and history.
